# Pharmacology

## Chapter -①

SN ① Routes of drugs administration →

① Mostly parental route
② TTS

advantage/ disadvantage

## Chaptor -②

** SN ② Bioavailability
* SN ③ Plasma protein binding

## Chapter -③

** SN ④ Microsomal Enzyme Induction
SN ⑤ first pass metabolism
** SN ⑥ first order and zero order Kinetics
SN ⑦ Plasma Half life

## Chaptor -④

SN ⑧ VI-PCR.
SN ⑨ Nuclear Receptors.
SN ⑩ Pharmacokenatics.
SN ⑪ Pharma codynamics.

## Chapter -⑤

SN ⑫ FDCs
***** SN ⑬ 5-factors Modifying drugs action.
* SN ⑭ Rational uses of Medicine.
⑮ drug tolerance.

## Chapter -⑥

** ⑯ Teratogenicity
P ⑰ drug dependence
P ⑱ Pharmacovigillance

## ANs

* ⑲ classification of cholinergic system, Anticholinesterase, and Uses of Anticholin-esterase.

** SN Mysthenig gravis -

** LQ (20) Classification of Anti cholinergic drugs, PA + MOA + uses + ADR of Atropine.

SN (21) Anticholiesterase poisoning.

(22) classification of Adrenergic drugs and uses

SN ⇒ ① Amphetamine ② Dopamine

***** (23) α - blockers classification, uses

***** (24) β - blockers classification, ADRs, Uses

***** LQ (25) drugs for glaucoma ● classification,

(i) open Angle glaucoma

(ii) close Angle glaucoma

## Autacoids

* (26) classification of H1 - Antihistamines, side effects, toxicity and uses.

***** (27) drugs therapy for migraine,

SN - Sumatriptan.

SN - Prophylaxis of Migraine.

(28) prostaglandin analogue - uses

***** LQ (29) NSAID's classification ★★ MOA + ADR + USES of Aspirin

(30) DMARD's classification

(31) classification of gout and treatment of gout

SN (i) colchicine

SN (ii) Allopurinol

## Respiratory system

R (32) drugs of cough → (i) classification

SN (ii) Bromhexine

***** LQ (33) drugs for Bronchial Asthma → classification details about → salbutamol, methyl xanthines + uses + MOA. leukotriene Antagonist, steroid therapy **

SN (34) status Asthmaticus

## Hormones

***(35) classification Antithyroid drugs, MOA + ADR + Uses
- Propylthiouracil (or) carbimazole
- Radioactive Iodine
- thyroid stroma

****(36) Classify oral hypoglycaemic drugs, MOA + Uses + ADR of sulfonyl ureas and metformin

* Management of Type-② DM

*****(37) classify corticosteroids, MOA + Uses (Indication) + ~~ADR~~ of ~~corticos~~
C/I of corticosteroids.

**(38) diabetic ketoacidosis.

SN (39) 5-α-Reductase inhibitors → finasteride

R (40) Sildenfil

R (41) HRT.

*****(42) SERMs

* SN (43) Letrozole, Mifepristone

*****(44) classification OCP's, MOA + ADR + Uses + C/I.

(45) Tocolytics (Uterine Relaxant)

*****(46) Bisphosphonates — MOA + ADR + Uses + classification.

## Skeletal Muscle Relaxants

(47) classification

SN (48) d-Tubocurarine

SN (49) Succinyl choline

SN (50) Pancuroniums

SN (51) dantrolene

## local Anesthatics

(52) classification, MOA + ADR + Uses

SN (52) lidocaine

## CNS

**** 10 (53) classify sedative - Hypnotics.
MoA + ADR + Uses + PA of diazepam (BDZ).
Adv. of BDZ over barbiturates.

(66) Anti arrythmic drugs → classification
SN lignocaine, Amiodarone, verapamil.

***** (67) Anti anginal drugs → classification.
MOA + ADRs + USES of Nitrates / CCBs.

SN (68) Nicorandil (K+ channel openers)

**** (69) drug therapy in MI.

***** (70) Anti-hypertensive classification.
** (i) MOA + ADR + USE of β-Blockers / Thiazides.
(ii) WHO-ISH and BHS 2004 guidlines.
** (iii) Hypertension in pregnancy.
** (iv) HTN in pregnancy.

## diuretics

(71) classifications
SN (72) furosemide / thiazide MOA + ADR + USES
SN (73) spironolactone → K+ sparing diuretics
SN (74) manitol → osmotic diuretics

## Blood

(75) oral / parenteral iron → Uses
R Acute iron poisoning
R (76) folic acid
R (77) Vit. K
***** (78) classification Anticoagulants
MOA + ADR + USES of Heparin ② Warfesin
→ LMWH
SN (79) Streptokinase
(80) classify Antiplatelets drugs
USES + ADR + MOA Aspirin ② clopidogril
SN (81) gp IIb / IIIa receptor antagonists.
(82) classify Hypolipidimic drugs
MOA + ADR + Uses of statins ② Atovastatins

***** SN (54) Purpose of PAM + drug used.

SN (55) Methyl Alcohol poisoning tretment.

***** LO (56) classify Antiepiletic drugs + details about.

MOA + ADR + USES

- Carbamazepine
- Sodium Vasproate
- Phenytoin

SN (57) status epilepticus

***** LO (58) classification of Antiparkinsonism

Levodopa → MOA + ADR + uses:

(Why levodopa + carbidopa)

(on - off effects)

*** LO (59) classify Anti-Psychotic drugs (Neuroleptics).

MOA + USES + ADR of Anti psychotic.

SN clozapine.

SN (60) drugs for bipolar disorders

MOA + ADR + uses of lithium carbonate.

(61) Anti-depressant classification.

TCA → MOA + ADR + Uses.

SSRIs → MOA + ADR + Uses.

***** LO (63) Classify opioids Analogesics

MOA + ADR + Uses of morphine

Naloxone.

## CVS

* SN (63) ACE Inhibitors → drugs, ADR + MOA + Uses.

* SN (64) ARBs → drug, ADR + MOA + Uses.

***** LO (65) classify cardiac glycosides:

drug for CHF management.

PA + MOA + ADR + USES of digitalis.

Vasodilators in CHF - Hydralazine.

UNIT

** SN (83) Treatment of Peptic Ulcer.
MOA + ADR + USES of PPI / Omeprazole.

** SN (84) Anti H. pylori drugs.

SN (85) NERD treat.

** SN (86) Classification Antiemetic
MOA + ADR + Uses of Metaclopramides & Ondansetroy

** SN (87) ORS and Treath of diarrhoeas.

** SN (88) Racecadotril.

## Anti-Microbial drugs

***** (89) classification Based on mechanism of Action.
(R) combined used of Antimicrobials.

(90) Sulfonamides MOA + ADR + Uses.

(91) Cotrimoxazole MOA + ADR + Uses.

(92) Quinolones (fluorquinolones) MOA + ADR + use of Ciprofloxacin.

(93) drugs for typhoid fever.

(94) classify semisynthetic ~~[illegible]~~ Penicillium,
* MOA + USES + ADR of Penicillium.
* Ampicilin uses.

** (95) β-lactamase Inhibitor MOA + ADR + USES (clavulanic acid)

** (96) cephalosporin classification MOA + ADR + USES (ceftriaxone)

** (97) Tetracyclines MOA + ADR + USES

** (98) Chloramphenicol MOA + ADR + USES

** (99) Aminoglycosides MOA + ADR + USES

** (100) Erythromycin MOA + ADR + USES

(R) (101) clarithromycin MOA + ADR + USES

(R) (102) Clindamycin. MOA + ADR + USES

** (103) Vancomycin MOA + ADR + USES

** (104) treatment of UTIs

***** (105) Anti-tubercular drugs → classification
LO
Isoniazid - MOA + ADR + USES
Rifampacin - MOA + ADR + USES
Treat. of T.B. → (i) dose of ATD (Anti tubercular drugs)
(ii) Catagorywise treat. regimen for T.B.
(iii) MDR-T.B.
(iv) Regimen for treat. of MAC infections.

★★★★★ (106) Anti-fungal drugs → classification

LO

| | |
|---|---|
| Amphotericin B | MOA + ADR + USES |
| griseofulvin | MOA + ADR + USES |
| ketaconazole | MOA + ADR + USES |

★★★★★ (107) Anti-viral drugs → classification

LO

| | |
|---|---|
| Acyclovir | MOA + ADR + USES |
| zidovudine | MOA + ADR + USES |

(i) first line Anti-viral regimen.
(ii) second line Anti-viral regimen.
(iii) Post-Exposure prophylaxis of HIV
(iv) perinatal HIV prophylaxis

★★★★★ (108) Anti-malarial drugs → classification

LO

Objectives and uses of Anti-malarial drugs

| | |
|---|---|
| Chloroquine | MOA + ADR + USES |
| Mefloquine | MOA + ADR + USES |
| Primaquine | MOA + ADR + USES |

★★★★★ ACT Regimens

(109) Antiamoebic drugs → classification

| | |
|---|---|
| Metronidazole | MOA + ADR + USES |

(110) Antihelminthic drugs → classification

| | |
|---|---|
| Mebendazole & Albendazole | MOA + ADR + USES |

SOL

| | |
|---|---|
| DEC<br>Ivermectin<br>Praziquantel | MOA + USES + ADR |

(11) Anti - cancer drugs → classification

cisplatin MOA + ADR + USES

Methotrexate MOA + ADR + USES

(12) Immunosuppressant drugs → classification

cyclosporine MOA + ADR + USES

(13) chelating Agents

★★ (i) BAL

★Ⓡ (ii) $CaNa_2$ EDTA

★Ⓡ (iii) Penicillamine

★★ (iv) desferroxamine

(14) Vitamines

★★ (i) Vit. A

★★ (ii) Vit. C

(15) Vaccine

★★ (i) BCG
